

MINI PTM REPORT-CLASS-V

Confidence comes from discipline and training; nothing builds self-esteem like accomplishment and applauds.

The Mini PTM for class V was held on 18th and 19th July 2018. It started with welcoming the parents followed by a presentation by the students.

The show started with the third language, wherein the students presented different activities and poems learned by them in class. The students demonstrated a group activity showcasing different elements of a circle learnt in Math. The presentation ended as they reiterated the benign use of internet and explained different rules to be followed for cyber security learnt by them in Information and Communication Technology.

Through the presentations, parents gained an insight about various concepts that their children are learning in school. The show was thoroughly enjoyed and appreciated by the parents.
