## REPORT- ASTRONOMY WORKSHOPS (1and 2)

### CLASS V

“In the attempt to make scientific discoveries, every problem is an opportunity - and the more difficult the problem, the greater will be the importance of its solution.”

- E.O Wilson

In order to accomplish the vision of overall development of our children, the students of Class V were provided with an opportunity to attend the Astronomy workshops on 12<sup>th</sup> July 2017 and 18<sup>th</sup> August 2017. They were exposed to the following workshops:

#### ‘What is your Zodiac?’

The workshop gave the children an opportunity to know more about the unexplored aspects of the Universe. The ‘Culture Pattern’ and the ‘Zodiac Wheel’ activities helped them to understand the scientific reason for the existence of the 12 zodiac signs. They were amazed to learn about the existence of inexplicable heavenly bodies.

#### ‘Mission to Mars’

The workshop helped the students to know about planet, Mars. Various activities were integrated which helped the children to realize the focal points of a space mission while exploring the importance of an effective communication channel in monitoring Mars rover to achieve various tasks.

Students are eagerly looking forward to more such enriching sessions!
