

## EARTH DAY REPORT – JUNIOR SCHOOL

The Earth Day celebration commenced on 17th April 2018. A short film – World Earth Day was shown to the students of the Junior wing to highlight the damaging effects of using plastic bags and bottles. The students pledged to take care of their mother Earth.

An array of events stimulated and enriched the students of classes 3, 4 and 5 as they took part in crossword puzzle solving on pollution and waste management. In other invigorating activities, class 3 students made beautiful crowns with inspiring quotations on Reading on them to mark the World Book Day while class 4 students created bookmarks using eco-friendly material with slogans on the value of plants. The articulation of the thoughts of class 5 students was at its best when they sketched out ‘An advisory for the newspaper’ on various environmental concerns.

A thought provoking assembly ‘Recycle for a Better Tomorrow’ by Junior school and a lively yet meaningful Nukkad Natak (street play) on minimizing the use of plastic products by the students of class 5 received an overwhelming response from one and all. Principal, Ms.Aditi Misra appreciated the assembly and motivated the students to pledge for using water only as much as they require and always carry a cloth bag for shopping .

The week-long engaging proceedings concluded on a refreshing note when students of class 5 wore green T-shirts and brought green colour food to school as a mark of their love and respect for mother Earth.
