

DELHI PUBLIC SCHOOL, SECTOR – 45, GURGAON

REPORT- ASTRONOMY WORKSHOP(MODULE 4)

"Man must rise above the Earth—to the top of the atmosphere and beyond—for only thus will he fully understand the world in which he lives."

Astronomy and Space Sciences are the most effective way to inculcate scientific temper in the young minds. Keeping this in mind, the fourth module of the workshop was conducted on 31st October 2017.

Class III

The 'MoonWatch' module was introduced to the students through a story using multimedia presentation. They learnt about the changing phases of the Moon and had an enriching time gathering knowledge about Moon and the stars. Young learners were acquainted with different constellations, bright stars and planets in the sky with the help of a telescope.

Classes IV and V

The 'Destination Moon and Planet' module commenced with the explanation about our nearest celestial neighbour- LUNA (Moon), its features and the planets visible from Earth. Subsequent to the presentation, students had an activity to understand the formation of lunar craters. At the end, they also had the sky tour through the telescope, wherein they enjoyed observing Moon, various constellations and Pole Star.

It was an extremely informative and a fun filled session which satisfied many queries of the growing minds. This was indeed a wonderful and expounding lunar workshop.
