

INFOTECH DAY REPORT

*“Learning gives creativity,
creativity leads to thinking,
thinking provides knowledge and
knowledge makes you great.”*

InfoTech Day was celebrated in classes III, IV and V on 26th Feb, 28th Feb and 1st March 2018 respectively. During this event, the children got an opportunity to exhibit their in-depth knowledge by participating in various class activities and lab competitions.

Across all the sections of class- III, ‘ Show and Tell’ activity was conducted which required the students to choose any one of the head gears with a device picture on it and also to speak about the corresponding devices. The typing speed of the students was put to test as a part of the Lab assignment.

Students of Class IV designed an eye-catching advertisement on electronic gadgets as a part of their class assignment. They enjoyed themselves by creating innovative comic strips with valuable messages during the Lab assignment.

Students of Class V solved a crossword puzzle on Cyber Security which helped them to enhance their knowledge base. They also found the Scratch animation as part of Lab assignment, very enriching.

It was heartwarming to see children share ideas in groups and apply their knowledge productively.
