

REPORT ON MATHEMAGIC

Mathemagic, an event organized by Delhi Public School's Mathematics club 'Pi Squad' was held on 5th December, 2017. The event started with the ribbon cutting and lamp lighting by the Principal Ms. Aditi Misra followed by the warm welcome speech in the auditorium.

On Mathematics day creativity in Mathematics was at its best as class III children enjoyed making 3D shapes. The activity assisted children in differentiating between 3D and 2D shapes. Class IV students observed patterns in calendar and were motivated to apply analytical approach towards dates and days which could be used in their daily lives. Mathambola was held in class V which helped students in improving their oral computational skills..

The events of the day were myriad both in topics they covered and the participants. Class VI took part in the activity- 'Measure it' wherein the Pi Squad members had an interactive session on estimations with them through videos and Power Point Presentations! As for the budding mathematicians of VII, the innovative Board game making activity – 'Board the fun' engaged their mathematical skills in the best way. The event had students up till grade XI actively and quite enthusiastically participating. Class VIII and IX graders wholeheartedly participated in Mathematical Role Plays- 'Play with Math' and 'Show Time' – The Mathematicians Show, respectively. Students of X and XI grade found themselves excited participants of 'Model it'- Model Making and 'Solve, Inspire, Evolve', the activity where students presented Mathematical solutions to problems faced by people in general like car parking, internet usage, pollution and water shortage. In addition, a mesmerising dance performance enthralled the audience.

It was indeed an enriching day which brought together the Math enthusiasts engaging in various activities and appreciating its presence in every walk of life.
