

ECO ADVENTURE CAMP FOR CLASSES 3 & 5

‘The sky is our roof, Earth our playground and nature our biggest teacher.’

Sometimes, the most memorable lessons in life don't come from a textbook. Outdoor education gears students to learn in action. Keeping all these in mind, an Eco Adventure Camp was organized for classes III and V at Najafgarh on 19th January'17.

The camp exposed the children to various challenging activities amidst the sprawling majestic setup at a countryside. A few of the activities organized at the camp were camel cart ride, bullock cart ride, rolling zorbing, wall climbing, burma bridge, balance beam, commando crawl, commando net, double channel bridge etc which ensured that our young enthusiastic campers came out as winners on completing each task successfully. It not only helped in raising their sense of self esteem but also strengthened their team work skills.

The students had a great fun filled day which they wished would never end. The Eco Adventure Camp seemed to have invigorated a new spring in their step and passion in their heart!
