

REPORT OF BUDDY READING (CLASS V)

“KNOWLEDGE EXISTS TO BE IMPARTED”

You teach what you have to learn. It is not necessary to have achieved perfection to speak about perfection. Students learn more effectively when they learn with each other.

On 11th October 2017, the students of Class VB visited the Primary wing of DPS Gurgaon to share the important message of celebrating Safe and Green Diwali with their younger buddies.

These young peer tutors created an impact in the minds of the tiny tots of classes I and II as they spoke about the harmful effects of bursting fire crackers. They not only spoke about the air pollution but also made them aware about the noise pollution caused by bursting crackers.

This crucial message of contributing towards a safer and healthier future was conveyed effectively by these young enthusiastic students and was equally well received by their juniors.
