

# REPORT- COLLAGE MAKING ACTIVITY (SMOG)

## (CEEC ACTIVITY)

To create awareness amongst the students about the ill effects of Smog on health and environment, a collage making activity was conducted on 17<sup>th</sup> Dec 2018. Future environmentalists enthusiastically researched the types of air pollutants, government measures to fight smog and innovative ideas on how to keep air fresh and clean.

While doing this activity students learnt about the various diseases that are caused by smog or air pollution and precautions to be taken to protect oneself from polluted air.

The activity aided in sensitizing the students on the need to reduce emissions caused by vehicular traffic, bursting of crackers etc to improve the air quality index.
