

## That's all it is: Curiosity

‘The important thing is not to stop questioning. Curiosity has its own reason for existing’.

An interactive workshop on ‘Curiosity and Thinking skills’ was conducted for the students of class IV on 12th May 2017 by an eminent educationist Ms. Shuchi Sharma. The aim of the workshop was to stimulate power of curiosity and develop a habit of reasoning.

Telling is a stop sign for thinking; questioning is a green light that allows students to explore their natural curiosities, personalize their learning and fuel their drive to know more. Clippings of different situations were shown and students were asked to describe them. This activity came as a handy tool to kindle interest, foster curiosity, stimulate thinking skills, promote effective communication and ensure greater understanding among the students.

It was an enriching and fun-filled experience for the students.
