# PI DAY

Pi day, an annual celebration all over the world, was conducted by DPS Gurgaon in a unique way on 22nd July 2017 (22/7) signifying the approximate value of π. On the occasion, a variety of activities were organised by the school for classes VI, VII and VIII. One of the highlights of the event was the narration of the story '**Sir Circumference and the Dragon of Pi'** through the smart class to the students of grade VI. The story was enjoyed immensely by the students who learnt interesting elements of a circle and the wonders of Pi.

Class VII students took part in a hands-on activity to deduce the **approximate value of pi** wherein they found the ratio of circumference to the diameter of differently sized circular cutouts.

The students of grade VIII, participated in an interactive session on **fascinating facts about pi**. They also learnt about the **usage of pi** in our day-to-day lives followed by a **crossword** in which everyone participated excitedly.

In addition, a **Pi-Champ** activity was conducted where the students were given one minute to memorise the digits of π to the maximum number of places. One of our students was able to memorize the digits upto 31 decimal places!!

Overall it was a successful event which saw enthusiastic participation by all and had something for everyone to take away as a learning experience.
