

Pi Day Report

Pi day was celebrated in DPS Gurgaon in a unique way on 23rd July 2018. It is an annual celebration of the famous mathematical concept that has fascinated people for millennia. A variety of activities were organised on this occasion which enriched the students of the middle school. An interactive session emphasizing the importance and usage of pi was held. Students also presented 'Pi' creatively in their notebooks and shared enthralling facts about it. The approximate value of Pi was deduced by demonstrating its relation with the circumference and diameter of a circle.

Class VI students took part in "Pi Word Challenge" activity, in which they wrote different words starting with pi. The students of grade VII participated in a "Pi-Champ activity" where they were given one minute to memorise the digits of π to the maximum number of places. Students of classes VI and VII also solved an interesting jigsaw puzzle based on the value of pi. In class VIII the students took part in "Pi Hunt Pattern finding" activity in which they looked for mathematical operations based relations among the consecutive digits in the value of π .

Overall it was a fun filled and a great learning experience for the students which definitely helped them to develop a sense of appreciation for the astounding "Pi".
