

PTM FEEDBACK
CLASSES III, IV and V (2017-18)

“Education is a shared commitment between dedicated teachers, motivated students and enthusiastic parents”

The most overwhelming key to a child’s success is the positive involvement of parents. Moving ahead with this thought a Parent Teacher Meet was held in September’17 for classes III, IV and V .

Parents met the class teachers for a detailed feedback on the progress of their child. It was a fruitful interaction wherein the parents not only discussed the academic progress of their child but also gained clarity on the social and behavioural growth of their child.

Journals and creative work done by the children in the previous months were kept on display for the parents. A slide showing the process of the School Bus Tracking System was shown to the parents.

The parents had a query about several activities conducted by the school in various subjects. Studies show that students learn best when learning is active. These hands-on activities assist in the teaching learning process. Parents were informed that the activity planner for classes III–V is available on the school portal to help parents procure the materials well in advance.

The parents appreciated the efforts taken by the school to inculcate the values of discipline and hardwork. A positive feedback was given by the parents on the efforts taken by the teachers for the overall development of the children.
