

Report - Earth Day Assembly

‘When one tugs at a single thing in nature, he finds it attached to the rest of the world.’ - John Muir

The world we all share is given to us in trust. Every choice we make regarding the earth, air, and water around us should be made with the objective of preserving it for all the generations to come. As a step towards inspiring, educating and motivating children to act, a special assembly was held on 22nd April 2024 by the students of the Junior Wing to celebrate the Earth Day.

The assembly commenced with the students of Head academic council interacting with class V students about the significance and importance of Earth Day. They urged everyone present to draw inspiration from the assembly and recommit themselves to protect the planet, inviting them to ponder, reflect, and contribute in their own way and spread the message of conservation.

Theatre has always been a powerful tool for social commentary and exploration. The students of Class IV and V enacted a poignant Nukkad Natak resonating with the voices of change for a healthier environment, centered on the Earth Day theme for 2024, ‘Plastics vs Pollution’. The students enacted with confidence and enthusiasm, raising awareness about the dire consequences of plastic pollution on our planet and its inhabitants. They urged the audience to reflect on the impact of our actions and reduce the use of plastics for a sustainable future.

The assembly ended with a jubilant dance performance through the graceful movements, the students showcased the joyous potential of planet Earth and pledged to nurture it through collective action and care.
