

Junior School - Math Day

THE ONLY WAY TO LEARN MATHEMATICS IS TO DO MATHEMATICS

Math day was celebrated across classes III, IV and V on 22nd January, 2021 to honour the work of the Indian mathematician, Srinivasa Ramanujan. The students were sensitized about his hard work and his contributions in the field of mathematics. The contributions made by other mathematicians were also discussed. It was a great motivation for the children.

An interesting 'Fun with 2D shapes' activity was organised for class III wherein students made a colourful scenery by assembling cut outs of 2D shapes. They thoroughly enjoyed this activity and gained deeper understanding of 2D shapes.

An application-based activity named 'Mathematics in my career' was conducted for class IV in which students portrayed different professions and highlighted the application of mathematics required in those professions. Their creative skills and understanding of various concepts were enhanced in a fun way.

Class V students were introduced to the traditional Chinese puzzle called 'Tangram puzzle'. They gained a stronger sense of spatial and rotational skills by recreating various shapes from tangram pieces.

Math day was a successful event as students understood the importance of mathematical concepts that encompass almost every sphere of life.
