

Imagica- Infant and Primary Wings

The students of Primary and Infant Wings celebrated Science week-Imagica in June 2021, the theme being 'Restore & Renew'.

Presentations, storytelling and simple experiments were carried out to help children understand how Earth's natural forces work. Aim was to help them become Nature and Wellness enthusiasts.

Through a plethora of hands-on activities the little ones were made aware how the processes like segregation of waste, composting, recycling and planting can help restore and renew our environment.

A short video on the story of Jadav Payeng, 'The Forest Man of India' was shown to reinforce that small steps can bring a big change.

The week ended with theme based fun filled dances and yoga sessions.
