

REPORT - CLASS ASSEMBLY

The key to effective studying is all about planning. It is a good idea to start the process now.

The morning sets the day for the students and the assembly paves the way to rejuvenate their spirits, remain rooted to the moral values and unleash their vitality. In view of the same, an online assembly was conducted for the students of middle school on 11th February 2022.

The theme of the assembly was 'Time Management and Hard Work'. The highlight of the morning prayer was courage to speak, honesty, goodness and truth. It was followed by thoughts and ideas about managing time skillfully and being persistent in their daily schedule.

Students were given tips on time management which would help them in achieving their goals like waking up a little earlier, setting SMART goals, keeping mornings for the most important tasks, avoiding distractions during their study time. This would end up saving a lot of time and take their efficiency levels a notch higher.
