

BAGLESS DAY ACTIVITY – 4.0

14th October 23

THEME – CLEAN INDIA, GREEN INDIA

CLASSES VI-VIII

"Clean India, Green India" encapsulates the vision of a sustainable and environmentally conscious nation. With the mission to work towards Swachh Bharat, the school organised its 4th bagless day activity for children of classes 6 to 8.

Students started their day by taking swachhta pledge to commit themselves towards the Swachh Bharat mission. They committed themselves to becoming active participants in a national effort to create a cleaner, healthier, and a more sustainable India which would not only benefit their immediate surroundings but also foster a sense of responsibility and awareness that can have a lasting impact on society as a whole. Students created an Anime mascot, their cleaning crusader for a Clean and Green India to be put up in their classroom notice boards.

Students developed a firsthand understanding of the impact of their actions on the environment by doing a simple exercise integrated with Jal Itihaas programme. They wore a t-shirt denoting the colour of water as they saw it. They further conducted a simple yet effective way to understand the importance of water in one's life by keeping a glass of water with them and then monitoring how wisely they use that water. Students wrote their observations and reflections about the same. They also honed their creative and imaginative skills by composing a short poem on water.

To encourage the idea of teamwork, collaboration and leadership qualities, students were made to work in groups to prepare a poster depicting the importance and various ways to ensure a clean and green India. Students wrote slogans and designed bookmarks raising awareness about the importance of maintaining a clean and green environment for a healthier and more sustainable future.

Paper bags were made from renewable resources by the students to promote awareness for a clean environment. Encouraging their use aligns with the goal of promoting sustainable practices and reducing the carbon footprint.

A quiz based on swachh bharat mission was conducted to improve the concentration of the children and to boost their confidence apart from entertaining them.

Last but not the least students enjoyed their time in the playground building not only physical stamina but learning the true sportsmanship spirit.

These activities played a vital role in instilling a sense of environmental responsibility among the students.

The students inferred that if these activities are pursued with dedication and comprehensive planning, they can contribute significantly to the realisation of a Clean and Green India, ensuring a healthier, more sustainable, and environmentally friendly future for the nation.
