

REPORT-BAGLESS DAY (3.0)

"Sustainability is not just about protecting the planet; it's about igniting our imagination to create a future where nature and humanity thrive together."

On Saturday, 21st September 2024, Delhi Public School, Gurgaon, conducted the much-awaited 'Bagless Day 3.0', on the theme 'Imagination Ignited', for the students of classes VI-VIII. The initiative aimed at promoting creativity, sustainability, and resourcefulness among students, focusing on hands-on learning and environmental consciousness.

The students were engaged in various tasks, such as Shoelace Tying, which enhanced their confidence and motor skills, making of Science Infographic posters to highlight the importance of sustainable choices and careful consumption, making of Eco-Conscious Budgets using various mathematical concepts for the upcoming festivals and a creative exercise that transformed waste materials into useful and decorative items, in sync with the motive of recycling and repurposing.

Through these activities, students fostered an understanding of making clear, cleaner and sustainable choices, and prioritised local and organic goods for the upcoming festivities. Bagless Day 3.0 was a resounding success, providing children with the opportunity to collaborate, create and learn valuable life skills while promoting sustainability confidently.
