

REPORT OF DILLI DARSHAN (2024-25)

Class III

‘Travel is more than the seeing of sights; it is a change that goes on, deep and permanent, in the ideas of living.’

Educational excursions are essential for imparting knowledge to the students in a relevant and engaging way. Delhi's diverse culture makes it one of the most popular travel destinations. In light of the aforementioned, an educational trip to Dilli Darshan was organized for Class III students on Wednesday, 16th October 2024. The students had an amazing opportunity to see the vibrant locations.

They visited numerous tourist destinations renowned for their rich cultural legacy. Qutub Minar, the beautiful UNESCO World Heritage site, was the first halt on the itinerary. The little elements of construction and inscriptions that went into creating the magnificent tower were explained to the kids. In order to keep the kids refreshed and energized for the day, healthy snacks were provided while travelling.

The next destination was Jantar Mantar, an astronomical observatory from the eighteenth century. The students were amazed to see the intricate architectural devices that were used to anticipate the time and motion of the celestial bodies. The students were served sumptuous lunch at Bikanerwala. They relished the food along with their friends and teachers.

The National Rail Museum, was the last destination and it was a fun experience for everyone. The museum had a vast collection of vintage locomotives, carriages, and railway relics that demonstrated the development of the railways in India. A delightful train trip around the museum's grounds was another enjoyable feature that made the day.

The kids had a great time exploring new places and strengthening their relationships with their friends while spending a day away from the school. The National Education Policy aims to promote a holistic approach to learning, and educational tours help students develop the required skills and knowledge. The trip proved to be an enjoyable, educational, and informative journey as it helped students learn in a fun way and gain knowledge but also contribute to understanding beyond the classroom.
