

# REPORT OF DILLI DARSHAN (2024-25)

## Class V

*“Tell me and I forget, teach me and I may remember, involve me and I learn.”  
– Benjamin Franklin*

An educational excursion is a wonderful opportunity for students to take a break from the classroom and to have some fun and excitement in an entirely new environment while learning at the same time. In line with the NEP guidelines for bagless days, a fun-filled educational trip ‘Dilli Darshan’ was organized for the students of class V on Friday, 18<sup>th</sup> October 2024.

On this enthralling trip to the national capital, our first stop was the Red Fort, a UNESCO World Heritage Site. Students were fascinated by the grandeur of its architecture, including the impressive Diwan-i-Aam (Hall of Public Audience) and Diwan-i-Khas (Hall of Private Audience). The visit was an opportunity for students to dive into India's historical roots and take pride in the architectural marvels of our historic past.

Our next halt was the National Science Centre. Students explored various exhibits, ranging from interactive displays on scientific principles to awe-inspiring demonstrations of cutting-edge technology. The visit offered students a firsthand encounter with scientific wonders and encouraged them to explore the world of science further. To refresh and energize the students, a scrumptious meal was served at Bikanervala.

Our final destination was the Rail Museum, a delightful experience for both history enthusiasts and train lovers. The museum showcased the evolution of railways in India, with an extensive collection of vintage locomotives, carriages, and railway artifacts. The museum also offered a joyous train ride around its premises, which was a memorable highlight of the day.

A drive through the India Gate, the National War Memorial, the Parliament House (old and new), North and South block also served an opportunity for the students to appreciate the grandeur of these architectural creations.

It was an enriching, fun filled experience for the children to spend a day away from the classroom and build closer bonds with their peers and to explore new environments. The trip not only enhanced the knowledge of the students but also fostered a sense of appreciation for India's heritage and scientific achievements.
