

REPORT ON DAY CAMP – CLASS III

“A day camp is not just a place to spend the day, but a space to grow, learn, and make memories that will last a lifetime.”

School camps offer a fun break from the regular school routine, giving students a chance to explore new activities and develop important skills. To encourage teamwork, creativity, and physical fitness, a special day camp was organized for Class III students on Saturday, 1st March 2025.

The day began with exciting Rocksport adventure activities at sector-47 like zipline, hamster wheel, commando net, burma bridge, tyre swing etc. These thrilling activities not only helped the children to improve their strength and agility but also taught them how to work together as a team. Students were taken to sector-45 to continue with the further plan of the day. The outdoor activities were followed by a creative clay modelling session, where they crafted their unique art pieces. To familiarize with their new surroundings in class IV, they were taken for a tour of the school. This helped them feel more comfortable and excited about their new learning space. Spirits were high and happiness could be felt in the air when they witnessed a lively performance by their own teachers. The day also included a storytelling session, where the children listened to captivating tales that sparked their imagination and curiosity. Throughout the day, the children enjoyed regular refreshments, including morning snacks, a scrumptious lunch, and evening snacks to keep them refreshed.

At the end of the camp, children received a goody bag filled with surprises and a photograph to remember the wonderful day they spent at the camp. The memories of the camp will surely stay with them for a long time.
