

# Diwali e- card making activity

## Class VI

*"An eco-friendly Diwali honors tradition while protecting the planet, with sustainable choices that light the way to a cleaner future."*

As a part of the class activity, students of class VI designed and created e-Diwali cards promoting eco-friendly Diwali. Students designed vibrant and colourful e-cards using digital tools. Thoughtful messages and greetings were added to make the e-cards personal. Students emphasised the importance of reducing waste, and protecting the environment by pledging to say no to crackers, promoting a cleaner and greener future.

This activity beautifully merged technology, art and environmental awareness.
