

Report on Industrial Visit to Varun Beverages Ltd

On Saturday, 5th April 2025, the Grade XII Commerce students went on an educational trip to Varun Beverages Limited, Nuh, Haryana—one of the largest bottling partners of PepsiCo outside the United States. The objective was to provide students with practical exposure to modern manufacturing processes and corporate operations.

After a fun-filled bus ride to the plant, the students received a warm welcome from company officials. They were first shown a safety video detailing the procedures to be followed within the plant. They were then taken on a guided tour to observe the entire production process. Company representatives explained the working of various machines, the process of transforming preforms into bottles and the assembly line in detail.

A comprehensive presentation followed, offering insights into the company's history, vision, financial operations and marketing strategies. It also highlighted the company's mission to maintain a sustainable ecosystem, its global presence and its efforts in accounting, cost management, community development and recycling. This was followed by an interactive session where students actively participated and asked questions.

Overall, the visit was an educational and memorable experience, giving students a deeper understanding of the real-world application of the theoretical concepts they have learnt in class.
