

Earth Week - Infant and Primary Wings

Earth Day was celebrated by the students of Infant and Primary Wing to understand and take responsibility of their role in preserving our planet. In keeping with the theme for the year 'Invest in Our Planet' several activities were conducted over a week like meeting Earth Pals, planting seeds, learning the importance of recycling through role play, craft making, as well as theme based song and dance.

The activities helped students understand the importance of planting trees, recycling, and learning about the impact of pollution on all who call Earth their home. Our Director Principal, Ms Aditi Misra attended the special Earth Day assembly, 'Guardians of the Earth'. She applauded the students for the beautiful presentation and emphasised that all of us together need to take care of our planet.

Aditi Ma'am and the students of class 2 planted a variety of millets. Ma'am shared with the students that our planet nourishes us all and hence it is our duty to protect and preserve it.
