

Global Educators Fest 2023

Artificial intelligence impacts everyone and academia is no exception. To discuss the future and role of AI in education, the 2023 edition of the Global Educators Fest was held in Jaipur from 10th to 12 August 2023. Organised by ScooNews, media platform for the education sector, the fest was attended by 743 educators and stakeholders from across the country.

During a Panel Discussion on 'Teacher-Student Relationship in the Age of AI: Redefining Roles and Dynamics', Ms. Aditi Misra, Director Principal DPS Gurgaon, emphasised on the importance of co-learning in a classroom for students and teachers. She highlighted the benefits of AI for students and educators. Ms Misra stated that before entering the classroom, a teacher has to be equipped with knowledge and content. Students learn and imbibe from the school, which teaches them right from the basics. She stated 'Let's embrace learning and learn ways of getting learning into the classroom'. One of the biggest fears of the students is Chat GPT. We need to assure them that learning can happen anywhere, and to embrace technology to their advantage without any fear.

The success of the fest emerged from the relevant discussions and opinions put forward by some of the best minds in the country.
