

Primary Wing-IMAGICA 2025 – Impossible Is Possible

The Primary Wing came alive with curiosity and excitement during the much-awaited Science Week 'Imagica', which revolved around the fascinating world of simple machines. The exhibition was inaugurated by Director Principal Ms Aditi Misra and Principal Dharav High School, Gurgaon, Ms Ritu Jawa.

Together, they explored the various exhibits, appreciating the hands-on efforts of the students and the creativity of the displays. From pulleys and axles to inclined planes and levers, young learners discovered how these simple machines make our lives easier and are present in our everyday surroundings.

The exhibition also featured models and demonstrations harnessing solar power including sundial, wind mill, and a solar cooker.

Adding to the enthusiasm, students from the Senior Wing joined in to celebrate the spirit of discovery. Senior school students showcased age-appropriate, theme-based experiments before the students, which aided the integration of science with experiential learning.

The celebration not only deepened scientific understanding but also fostered a sense of awe and appreciation for the wonders of science in the students.
