

INTACH ACTIVITY – MAY

MIDDLE SCHOOL (2024-25)

On 15th May, 2024, INTACH School group organised engaging activities for students of the Middle School to celebrate ‘World Museum Day’. The objective was to foster appreciation for museums through artefact exploration and poster design.

Artefact Exploration:

Students selected an artefact from an Indian museum, researched its history, origin, and cultural significance. They uncovered the stories behind each artefact, diligently documenting their findings through sketches and detailed write-ups. This meticulous approach not only enhanced their own understanding but also contributed to the broader appreciation of cultural diversity and historical significance preserved in museums.

Poster Design:

In this activity, students created visually appealing posters to promote museum appreciation. Each group incorporated sketches of iconic Indian museums or significant artefacts into their designs. Catchy slogans and compelling visuals were utilized to captivate viewers' attention and encourage exploration of museums.

Through these activities, students not only gained a deeper understanding of the importance of museums but also developed a sense of pride in India's rich cultural heritage.
