

INTACH ACTIVITY FOR MIDDLE SCHOOL, OCTOBER'23 'OUR FASCINATING FRUIT HERITAGE'

On the 10th of October 2023, the INTACH (Indian National Trust for Art and Cultural Heritage) club at Delhi Public School (DPS) Gurgaon organised an engaging and educational activity centered around the theme "Our Fascinating Fruit Heritage".

The activity began with students learning about the rich history of fruits that are native to India. Students enthusiastically researched and compiled a list of these fruits, delving into their unique geographical origins and historical significance. This exercise not only enriched their knowledge but also heightened their awareness of the diverse natural heritage within the country.

Following their research, the students took part in a creative session where they selected one native Indian fruit and sketched it meticulously. These drawings were accompanied by labels that detailed the fruit's name, characteristics, and significance. This artistic endeavor allowed students to connect with the natural world through the lens of art as well.

The highlight of the activity was the creation of miniature paintings. Students were instructed to utilise fruits as decorative elements within their artwork. They painted scenes that depicted gardens and orchards, with fruits integrated into the landscape.

The "Our Fascinating Fruit Heritage" activity organised by the INTACH club at DPS Gurgaon not only provided an opportunity for middle school students to explore India's rich fruit heritage but also fostered an appreciation for the natural world and environmental conservation.
