

INTACH ACTIVITY- SEPTEMBER MIDDLE SCHOOL

To spread awareness about the importance of 'Green Energy', the INTACH School group organised an activity on 19th September 2022, for the students at Middle School. The theme of this activity was '**Environment Clean by Choosing Green!**'

Students made banners and posters to showcase how green energy provides the highest environmental benefit by including power produced by biogas, solar, wind and geothermal energy.

They added slogans, new facts as well as illustrations in their work which enhanced the enrichment and engagement of the students in this activity.
