

Heirloom Hunt

INTACH school group had organized an activity – Heirloom Hunt for middle school students between 12th to 18th April 2021. The children interacted with their parents and grandparents to search for their family heirloom and unfolded the story behind it by connecting with the family members. Many children finally got to know about the history of some relics/items/things they see on a daily basis but never actually understood its relevance. Some of the interesting heirlooms found were grandfather’s gramophone, grandmother’s knitted quilt or great great grandparent’s clock. They enjoyed hearing about the history of the object, who first owned it, how long they had it for and how it had sentimental value. The children found their family heirloom fascinating and felt connected to generations before them.
