

## **Report – Jhelum House Assembly and Award Function**

**‘Never doubt that a small group of thoughtful, concerned citizens can change the world.’**

According to the World Health Organisation, air pollution is 'the biggest environmental risk to health' and a public health emergency. Keeping this theme in mind, the Jhelum House students of the Delhi Public School, Sec 45 organised an assembly on 26th October 2023, with the objective of raising awareness of the need for clean air and being mindful to improve air quality, in their school and neighbourhood.

The assembly commenced with an inspiring and splendid rendition of the school anthem by the school choir. This was followed by a motivational group song with the message to come together and act responsibly for cleaner air. The skit ‘Action Air’ was an immersive experience, as the students enacted with great confidence and impressive dialogue delivery. Where words, expression, and cause intersect, Nukkad Natak evolves as the most influential way of spreading awareness. The enthusiastic and powerful performance by the students reiterated the message to mitigate air pollution.

Awards were given to the students of Class III (2022-23). The Director Principal, Ms. Aditi Misra addressed the gathering and urged everyone to come together and make a resolution to reduce air pollution. She thanked all the parents for their constant support. She also congratulated the awardees for their consistent hard work and excellent academic performance.

The event culminated with the vote of thanks by the Headmistress, Junior Wing, Ms. Laveena Hemrajani. She applauded the efforts of the participants for their enthusiastic performance and thanked the parents for their whole-hearted involvement.
