Junior School- National Mathematics Day

*‘Mathematics knows no race or geographic boundaries;
for Mathematics, the cultural world is one country.’*

Indian Legendary Mathematician, Shri Srinivasa Ramanujan was born on 22nd December 1887 and took the world of Mathematics by storm at a very young age. National Mathematics Day was first observed in 2012 when former Prime Minister Dr. Manmohan Singh declared this day as National Mathematics Day on February 26, 2012, while visiting Madras University to pay tribute to Ramanujan's achievements and celebrated his 125th birth anniversary. Since then, it is observed every year on December 22 to honour Ramanujan's work in the field of mathematics.

The students of classes III, IV and V celebrated this day with great zeal and enthusiasm. They were briefed about his hard work and contributions in the field of mathematics. Few riddles were asked by the mathematics teachers to give them an insight into the world of mathematics. The students answered promptly as they could relate it to their daily life activities.

Mathematics Day was celebrated with the objective of creating awareness about the importance of mathematics in our day to day life situations and to boost student's interest in the subject. This day encouraged young minds to dive deeper into the magical world of mathematics and enjoy the learning process.
