

REPORT- CYBER SAFETY AND DIGITAL CITIZENSHIP

The cyber congress of the school, with the help of other teachers of IT Dept., sensitized the students of 6th grade on cyber safety and digital citizenship on 25th March 2021 and 26th March 2021. A brief session was taken for all the students through virtual mode.

A presentation was shown on Cyber Safety and Digital Citizenship, which emphasized on the importance of being digitally safe, such as how to connect and manage digital devices safely, what all measures should be adopted while connecting devices to the external world and also while pairing devices with other devices. The Do's and Don'ts of the cyber world were discussed with the students to make them more vigilant, safe and aware in this new digital age. The need for digital citizenship has become indispensable as it helps them achieve and understand digital literacy, at the same time ensuring online safety, digital responsibility and prevention from cyber bullying. It also ensures digital health and wellness, especially in a world which is increasingly dependent on internet. The session emphasized on understanding ethical issues in the classrooms, encouraging students to think about technology's purpose in all forms of digital interactions, conducting oneself ethically in the virtual world and educating others to responsibly share, download or commenting on social media. It enriched the students with the knowledge to make informed choices and develop the right attitude towards becoming responsible digital citizens.
