

SRCC Economics Summit 2025 – Reflection

Students from Grade XII of Delhi Public School, Sector-45, Gurgaon attended the Annual Economics Summit 2025, on 8 April 2025, hosted by the prestigious Shri Ram College of Commerce.

This enriching summit offered students a valuable opportunity to deepen their understanding of India's economic policies and their connection to the evolving global geopolitical landscape. From exploring landmark events like the 1991 Liberalisation policy and the '.com bubble burst' to analysing contemporary concepts such as de-dollarisation and Blue Economies, the summit provided insights into the long-term economic shifts shaping the current world economy.

The event also encouraged students to view economic challenges through the lens of diverse stakeholders—including journalists, economic analysts, and naval forces—on key topics such as tariff barriers, foreign trade agreements, and the role of international organizations like BRICS in global development. A special highlight of the summit was a spectacular performance by the naval band, which left the audience in awe and added a memorable cultural touch to the academic experience.

Additionally, the students gained practical knowledge about the CUET examination and life at SRCC through meaningful interactions with current students and a guided tour of the college campus. Overall, the visit proved to be an engaging, enlightening, and truly rewarding experience for all participants.
