

Earth Day Activity

Unwrap Sustainability

To commemorate Earth Day, students of Classes IX and X participated in a thought-provoking activity titled 'Unwrapping Sustainability'. This initiative aimed to raise awareness about the environmental impact of everyday choices, focusing specifically on the often-overlooked practice of gift wrapping.

The Eco -Warriors of each class introduced the topic through an engaging presentation that illustrated how small, mindful actions , like choosing sustainable alternatives for wrapping gifts, can collectively contribute to environmental conservation. The session not only encouraged students to rethink their gifting habits but also equipped them with creative, eco-friendly wrapping ideas using reusable or biodegradable materials.

As part of the activity, students explored and shared various sustainable gift-wrapping methods. A poster summarising these ideas was also displayed to reinforce key takeaways from the session.

Through this initiative, students gained a deeper understanding of sustainability in daily life and were encouraged to become more responsible global citizens.
