

Report on Diwali Activity

'It is time to remove the darkness of ignorance within us and replace it with the light of hope and knowledge instead.'

Diwali festival is one of the most celebrated festivals in India that embodies joy and happiness but at the same time it is also associated with excessive bursting of crackers which contributes significantly towards the rising levels of noise and air pollution.

The festival of lights came alive at Delhi Public School, Sector 45 from 12th October 2022 to 17th October 2022 when the students of Junior School lead the way in spreading the message of pollution-free and eco-friendly Diwali by making tea light holders from waste material. The activity enhanced the creative skills of the students and everyone was enthralled with its colourful and beautiful outcome. A poster making activity was conducted on the topic 'Safe and Green Diwali'. The creative strokes and the ignited minds of these young environmentalists painted and collated beautiful posters which were later displayed in the classrooms and created a perfect setting for the forthcoming festival season and reinforced the idea of celebrating a safe, green and pollution free Diwali.

Nukkad Natak on 'Harit Diwali' was performed by the students of class V at the Primary Wing Sector 47 and also at Sector 45 which inspired the young minds to celebrate green and safe Diwali. The young eco-warriors walked through the school corridors with colourful posters and raised slogans like 'Say no to crackers and yes to life'.

The activities came to an end with lots of joy and happiness on the faces of all the students which left no stone unturned to ensure that the students bask in festivities and yet learn something new.
