

Report- 'Save a Watt'

‘Saving electricity is producing electricity.’

Earth Hour is one of the world’s largest grassroots movements for the environment. Held every year on the last Saturday of March, Earth Hour engages supporters from more than 190 countries and territories, all taking action to ensure a brighter future for people and the planet.

By conserving the energy, we make sure that it is available for our future generations too. The sources of energy from which electricity is generated are limited and should therefore be conserved.

With an aim to spread awareness about the importance of saving electricity, students of Junior School, DPS Sec-45 visited primary, junior and middle wings on 25th March’22. The young eager eco warriors carried colourful posters and placards of slogans to cultivate a sense of duty towards energy conservation.

The Dean, Student Welfare, Ms. Sapna Dhawan and the Headmistresses appreciated the students and motivated them for this noble drive.

This crucial message of Saving Electricity for our future generations was conveyed effectively by the enthusiastic eco warriors and was well received by their peers and seniors.
