

REPORT ON EARTH DAY

JUNIOR SCHOOL

‘Say no to plastic for a better and greener tomorrow.’

Earth Day, observed on 22nd April every year, is the perfect time to spread awareness about the importance of protecting Mother Nature. As always, this year also, the students of DPS Sec 45, Junior Wing, celebrated Earth Day with great enthusiasm.

Short videos based on the theme of Earth Day 2024, ‘Planet vs Plastics’, were shown to the students of classes III, IV and V. The thought-provoking visuals inspired the young minds to reduce and replace plastics with sustainable options. The students pledged to take care of our one and only Mother Earth.

An engaging assembly commenced with an interactive talk on the importance of Earth Day by the members of the Senior Head Council, Shrija Singh and Arav Chopra. The Senior Mistress of Junior Wing, Ms. Geetu Khanna, addressed the audience and guided them to take a pledge to incorporate eco-friendly ways in their daily routine. An impactful *Nukkad Natak* highlighted the adverse effects of plastics on our body and received a heartening response from the students. The assembly concluded with a delightful dance performance to the song, ‘Planet Earth is a Happy Place’.

Interesting activities were organized for the students around the Earth Day, wherein Class III students created Earth Day mementos using moulding clay and reusable paper, while the students of Class IV made an Earth Mosaic poster by reusing newspaper. They illustrated thoughtful ways to reduce the use of plastics and wrote effective slogans on Earth Day. Class V students crafted table organizers by recycling cereal boxes.

All the events successfully raised consciousness among the students to incorporate small and effective changes in their day-to-day lives to conserve nature.
