

REPORT ON SAVE A WATT

“Saving energy today will make tomorrow bright.”

Discovery of electricity is the greatest achievement of man. The invention of electricity paved path for better avenues relevant to humankind. But, the source from which the electricity is generated is limited in quantity and therefore, should be conserved for future generations.

With an aim to spread awareness about the importance of electricity and the need to save it, eco-warriors visited the Junior classes on 5th April 2023 to raise awareness among their peers and motivated them to cultivate a sense of duty towards mother Earth.

The Vice Principal, Ms. Santvna Thadani and the Consultant of Educational Group of RJ Corp, Ms. Rashmi Singh, appreciated and motivated the students for being a part of this noble drive.

The message- ‘Cherish the Earth through energy conservation’ was effectively conveyed by the students and was well - received by their peers.
