

INTERNATIONAL DAY OF BIOLOGICAL DIVERSITY

The INTACH (Indian National Trust for Art and Cultural Heritage) in collaboration with the CEEC (Council for Environment and Cultural Heritage) club of Delhi Public School Sector 45 Gurgaon celebrated the International Day of Biological Diversity by organizing a class board-making activity for class IX students which focused on medicinal plants.

The initiative aimed to raise awareness about the importance of preserving our rich biodiversity and the healing properties of plants which form an integral part of our organic heritage. Students enthusiastically participated in the event, researching and creating informative boards about various medicinal plants. They showcased the plants' scientific names, medicinal uses, and their significance in traditional medicine.

Students also visited the school herb garden to learn about various herbs, their uses, and cultivation methods, fostering hands-on learning and environmental appreciation.

Both the activities not only fostered creativity and teamwork but also imparted valuable knowledge about the rich diversity of our natural resources. It highlighted the role of plants in maintaining a balanced ecosystem and promoting the well-being of mankind. The event was a great success and contributed to nurturing a sense of environmental responsibility among the students.
