

Bagless Day 1 , Middle School 27th April 2024

**Earth provides enough to satisfy every man's need but not everyone's greed'.
Mahatma Gandhi**

Bagless Day is an opportunity for the students to take a break from academics and showcase their talent. The much-awaited 'Bagless Day' was once again started for the new academic session of 2024 - 25. It was organised for the students of Middle School, on Saturday, 27th April 2024 in Delhi Public School, Sec 45, Gurgaon.

On the bagless day at Middle School, students immersed themselves in an educational journey centred on medicinal plants. Through engaging discussions, they explored the diverse benefits of various plants. Following this, students embarked on a hands-on activity, crafting step-by-step guides to prepare a healthy and aromatic refreshing drink using medicinal plants, accompanied by vibrant visual representations. The creative process continued as they composed lively limericks highlighting the advantages of consuming their concoction. Culminating the activity, students showcased their poetic talents by reciting their limericks to the class, spreading awareness and appreciation for the natural world's medicinal wonders. Through collaborative brainstorming, students devised creative solutions to repurpose the use of discarded items, promoting sustainability and reducing waste. Using vibrant infographics, they illustrated innovative ideas such as transforming plastic bottles into planters, repurposing old newspapers for crafts, and upcycling glass jars into storage containers. Students embarked on a culturally enriching journey through the Panchatantra tales. Encouraged to delve into the timeless fables, they selected their favourite story and brought it to life through folk-style paintings. Using recycled brown bags as canvases, students meticulously crafted vibrant illustrations, weaving together elements of tradition and creativity to create captivating storyboards. By combining storytelling with visual arts, students engaged in a multidisciplinary exploration of cultural heritage and sustainability, leaving them with a deeper appreciation for both the tales of the Panchatantra and the importance of eco-friendly practices. These activities not only raised awareness about the environmental impact of household waste but also empowered students with practical strategies to contribute to a greener future. The holistic approach not only fostered environmental consciousness but also empowered students to harness nature's gifts for health and well-being.
