

Report - Diwali Lantern Making Activity

Students from classes VI to VIII participated in Diwali Lantern making activity with zeal and endeavour that one usually associates with this festival. This activity was conducted through online mode and brought with it a wave of excitement, happiness and hope. Children created paper lanterns and painted beautiful *diyas*. This added colour to their festive celebration.

The students were motivated to make 'Lanterns' keeping the 4R's (Recycle, Reduce, Reuse and Recreate) in mind. It was indeed an innovative approach towards promoting a sustainable and eco-friendly Diwali. Students used various colour schemes to express their ideas in their unique way.

The students enthusiastically participated in the activity. They showcased their skills by posting pictures of Diwali lanterns made by them. Their artisanship was quite alluring and was much appreciated by one and all.
