

Report – Science Day (Junior School)

‘Every brilliant experiment, like every great work of art, starts with an act of imagination.’

Science has always captivated our imagination, continuously driving scientists worldwide to explore and discover more. Science Day, a vibrant and educational event, was celebrated with great zeal and excitement on 3rd December 2024 for Class III and on 7th December for classes IV, and V, providing students with a unique opportunity to engage in hands-on learning experiences.

Safety First! Class III students participated in a Role-Play competition wherein they showcased their creativity and awareness about safety protocols. Designing a novel Safety Sign gave wings to their innovation and imagination while promoting awareness about potential dangers in different situations in a fun and engaging manner.

Class IV engaged in a Show and Tell competition, discussing information about ‘The Great Indian Scientists’, both ancient and modern. Students shared fascinating stories and achievements of scientists like Sushruta, Charak, C.V. Raman, Homi J. Bhabha, A.P.J. Abdul Kalam to name a few, which provided them with an opportunity to delve into their notable contributions and inspired them to appreciate the field of science. The Tri-Colour Salad decoration, a fun activity promoted patriotism and healthy eating habits amongst the students. A captivating demonstration of meaningful experiments by teachers for the students of Class IV amazed them and ignited their curiosity. The experiments were simple yet intriguing that explained basic scientific principles, encouraging students to observe attentively and think critically.

‘We are what we eat!’ a Role-Play competition wherein students of class V creatively explored and portrayed the importance of healthy eating habits. The Rainbow Salad decoration activity was a great way to learn about healthy eating habits in an enjoyable way. Their photo sessions with theme-based selfie sticks, and a decorative photo booth were a delightful part of the day.

The Science Day celebration was a resounding success, providing students with a unique opportunity to engage in interactive learning experiences. We are proud of our students' enthusiasm and creativity, and we look forward to continue to inspire and empower them to become the next generation of scientists, thinkers, and leaders.
