

Report: Infinite Library- Shadow Puppetry Theatre Workshop on 19.08.2023

As part of a project by Max Mueller Bhavan, German learners from grades 7th& 8th visited the National Crafts Museum. The tour of the museum commenced with visiting a gallery of Indian heritage paintings and terracotta statues depicting a village, followed by an exhibition of ancient handicrafts, handmade *kathputlis* and vibrant art pieces. Next was a VR experience which was the highlight of their visit. The students also learned about the different ways in which puppets were made and got the chance to make their own shadow puppets. Learning new things about puppetry, exploring their country's culture and meeting people with such passion for the art form was truly memorable. It was a wonderful opportunity and exposure for the students.
