

DUKE OF EDINBURG'S- IAYP GOLD RESIDENTIAL PROGRAMME

Visit to Village Ghamroj

The IAYP Gold Award participants of class XII visited village Ghamroj for a two days residential project on 13th & 14th March 2023. Their first stop was a brick factory where they got the opportunity to see the process of making bricks and gained the practical experience of working at this site. They interacted with the workers and their children to understand their problems, daily routine and livelihood conditions. Thereafter they visited a poultry farm followed by onsite exposure on farming activities and interaction with the farmers working in the fields.

On the second day of the programme, the participants went to see the local dam in the village. They explored the area through trekking. On their way back from the trek they visited Ms. Khushi who had earlier represented the state of Haryana in Football at the National level. She shared her inspiring journey and experience with the students. After that, they went to visit a household which was involved in sculpting and idol making. They saw beautiful sculptures being moulded and built from melted metal.

This was followed by an interview with the Sarpanch of the village, who spoke to them about the villagers and the working of a Panchayat. They learnt about the problems faced by them including medical emergencies for which they have to refer to doctors in the city. The students also taught the children of classes VII and VIII at Vivek Bharti Sr. Secondary School. They performed a Street Play followed by an awareness campaign on Health, Hygiene and Menstruation.

The visit to the village was an interesting and fruitful experience for the young learners.
