

## REPORT ON STORY TELLING

‘There’s always room for a story that can transport people to another place.’

Storytelling is a conventional art form, used to inform, entertain and educate. It is often used as a medium to ingrain moral values, improve reading and listening skills. Storytelling helps to develop a sense of empathy among children as they put themselves in the shoes of the protagonist. It stimulates their imagination by transporting them to another world.

With the objective to entertain and educate the students, a storytelling session was organized for the students of class IV on 9<sup>th</sup> March 2023 in the school auditorium. Ms. Simi Srivastava in collaboration with Scholastic Pvt. Ltd. conducted a funfilled and interactive session for the students. She intrigued their interest and kept them involved. Her creative gestures, facial expressions and body language made the session lively.

It was a great learning experience as the story concluded with a moral which was much appreciated by the students.
